

September 18, 2014: The DC considered the DC Question and determined that more time was needed to review the documentation in order to reach a determination on the question. DC members agreed to extend the deadline for holding a binding vote on this DC Question and to defer deliberation of the DC Question until a memo analysing the documentation was produced by the Member who submitted the DC Question and that memo was reviewed by the DC. The next meeting will be held at a time to be determined by the DC Secretary.

Furthermore, DC Members added that in circumstances where Eligible Market Participants request the DC to make Substitute Reference Obligation determinations in future, they would be required to provide sufficient information for the DC to make such determinations.
